

# MAINE TIRE

## DKX RUBBER PRESS-ON

### WIDE PROFILE NON-SKID

#### CONSTRUCTION

DKX rubber press-on tires feature a wide, aggressive tread design to deliver exceptional traction in the most demanding applications.

MaineTire's DKX Tire is your solution for:

- Wet, slick, and loose surfaces where traction is a concern
- Applications where improved stability and greater load carrying are desired

#### FEATURES

- Super wide footprint and aggressive tread creates more surface contact for increased traction and load distribution
- Low heat build-up during operation
- Concave sidewalls provide improved shock absorption and reduced snagging
- Guaranteed performance meeting MaineTire quality specifications
- Oversized center running bar provides increased stability
