SPECS

Pneumatic Tire Size	Tire Size	Disc	O.D. (in)	RUBBER THICKNESS (in)	WIDTH (in)	Tire Weight (lb)	Load Capacity (lb)	Pneumatic Capacity (lb)
17.5x25	55x10x18	2 Piece	55	10.0	18.0	1,478	22,015	18,200
20.5x25	59x12x20.5	2 Piece	59	11.5	20.5	1,966	26,035	22,700
20.5x25	62x13x21	2 Piece	62	13.0	21.0	2,273	27,660	22,700
23.5x25	66x16x24	2 Piece	66	16.0	24.0	3,043	32,260	27,600
26.5x25	69x17x28	2 Piece	69	17.0	28.0	3,867	39,090	37,500
29.5x25	73x18x31	2 Piece	73	17.7	31.0	4,726	44,790	41,800
35/65-33	80x18x35	1 Piece	80	18.0	35.0	7,055	58,400	58,400

APPLICATIONS

- Waste Transfer Stations
- Metal Recycling
- Construction & Demolition
- Steel Mills & Foundries
- Heavy Industrial
- Quarries and Open Pit Mining
- Underground Mining

BRAWLER[®] SOLIDFLEX HD

LOTR

BRAWLER SOLIDFLEX HD

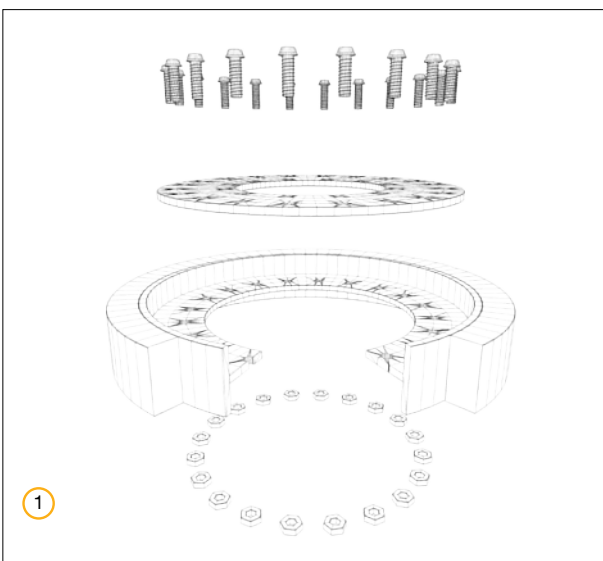

The new Brawler Solidflex HD tires are engineered to perform in the most extreme applications where improved ride quality is required. These include scrap metal recycling centers, waste transfer stations and open pit mining operations.

The Solidflex HD features elliptical apertures that deliver unprecedented ride comfort which results in reduced equipment wear and operator fatigue.

FEATURES AND BENEFITS

1. Durable, cut resistant rubber compound translates into no downtime from flats or sidewall cuts resulting in a lower cost per hour.
 - TFT Rubber compound – premium mining compound for high abrasion and cut resistance.
2. Elliptical apertures provide a softer ride which reduces operator fatigue and equipment wear – ultimately delivering improved productivity.
3. Three times more wearable rubber than regular pneumatic tires.
4. Steel wheels engineered with the strength and flexibility to handle overloads, excessive torque, severe shear and bending stress.
5. Two piece patented wheel and disk system* that allows interchangeability on equipment simply by changing the disk – no specialized equipment is required.
6. Custom traction tread available up to 7 inches deep.

* The Brawler Solidflex HD features an exclusive patented 2 Piece Adapter Rim for wheel assemblies.

FEATURES

- 1 Two piece patented wheel and disc system for interchangeability on equipment.
- 2 Elliptical apertures provide a softer ride which reduces equipment and operator fatigue.
- 3 Premium mining rubber compound engineered for high abrasion application and superior tire life.
