

NEW PRODUCT RELEASE

# BRAWLER<sup>®</sup> FEEDER FLEX

## BRAWLER FEEDER FLEX

The new Brawler Feeder Flex tires are engineered to perform in the most extreme high wear applications where down time can get messy and costly. The Feeder Flex tire features elliptical apertures to deliver unprecedented ride comfort which result in reduced equipment fatigue.

## FEATURES AND BENEFITS

- Complete Assembly that bolts right on to the OE Axle.
- Durable, cut resistant mining rubber compound that has increased Tensile and Tear strength over standard rubber compounds that translates in to no downtime from flats or sidewall cuts resulting in a lower cost per hour performance.
- Elliptical apertures that provide a pneumatic type ride without the bounce resulting in greater stability and control.
- Increased Load Carrying Capacity over pneumatic tires and no worries about maintaining specific air pressures.
- Maine Industrial Tire manufactures application specific-purpose built tires.

## SPECS

Overall Diameter (in)	Rubber Thickness	Section Width (in)	Weight (lbs)	Load Carrying Capacity (lbs)
				5 MPH
30	4.65	16	367	12,000
38 *	5	17	665	16,400
48 *	6	24.5	1520	30,700

\* Currently in development

## APPLICATIONS

- Off Road Haul Wagons
- Feeders
- Mixers
- Manure Spreaders
