

PERMA GROOMER TRACTOR BOGIE WHEELS

Perma Groomer solid Tractor Bogie Wheels are designed and built specifically for the following snow grooming vehicles:

- LMC
- Tucker
- Prinoth
- Bombardier
- Kassbohrer
- Pisten-Bully

ADVANTAGES

NO FLATS, CASING OR FILL:

Never again experience flat tire downtime. Perma Groomer tire/wheels are solid rubber tires with no casings to shred and wrap around the axle, and no foam to spill out onto the snow.

PERFORMANCE & RIDE:

Designed with a superior bond process, these units will outperform any pneumatic, filled pneumatic or solid rubber tire available yet have a ride that is comparable to properly inflated pneumatics.

TRACK BELT TENSION:

These units afford precision track and belt tensioning while providing improved handling.

SPROCKET LIFE:

Greatly extended sprocket life is an added benefit of precise tire/track guide fit due to improved lateral track control.

PERMA GROOMER TECHNICAL SPECIFICATIONS:

- Custom steel wheels manufactured to exact specifications from A-36 plate
- Spindle mounts are CNC machined from D.O.M. tubing
- Engineered with cold weather rubber compound
- 64 Shore A hardness
- 4000 lb/in² tensile strength
- High abrasion resistance
- High cut and tear resistance
- **Made in the U.S.A.**
